

# OLED Design Contest - CombOLED Edition

Ideas contest for new lighting OLED-based applications  
Contest proclaimed within the dissemination activities of the CombOLED European Project

Within the European CombOLED Project that involves seven relevant companies and Institutions in the new solidstate lighting field, the OLED Design Contest has the aim to collect smart and stylish ideas able to express the explosive potential of the OLED technology.

You'll have the opportunity to utilize the transparent lighting sources with an extremely limited cost and to express your luminous vision of the future. Moreover, you'll have the possibility to win a consistent award and to have your idea selected and realized, at the end of the European project, as flagship of the OLED technology.

Based on the innovative transparency characteristic and on a final competitive cost, participants are invited to submit their projects preferably on the following three fields:

- mood lighting / emotional lighting;
- static signage;
- low-content information display.

The contest purpose is to highlight the novelty and the versatility of this new technology taking richly advantage from their peculiar characteristic within the targets of the CombOLED project.

Within the contest, three different categories have been defined:

- Students;
- Professionals;
- CombOLED workshop attendees.

The official calendar of the contest is briefly summarized as follows:

- |                                |                                  |
